

The Wildlife Token

\$WILD

www.thewildtoken.com

Overview

Wildlife token is the practice of protecting plant and animal species and their habitats. As part of the world's ecosystems, wildlife provides balance and stability to nature's processes. The goal of **wildlife token** is to ensure the survival of these species, and to educate people on living sustainably with other species.

The human population has grown exponentially over the past 200 years, to more than seven billion people today, and it continues to rapidly grow. This means natural resources are being consumed faster than ever by the billions of people on the planet. This growth and development also endanger the habitats and existence of various types of wildlife around the world, particularly animals and plants that may be displaced for land development, or used for food or other human purposes. Other threats to wildlife include the introduction of invasive species from other parts of the world, climate change, pollution, hunting, fishing, and poaching.

National and international organizations like the World Wildlife Fund, Conservation International, the Wildlife Conservation Society, and the United Nations work to support global animal and habitat conservation efforts on many different fronts. They work with the government to establish and protect public lands, like national parks and wildlife refuges. They help write legislation, such as the Endangered Species Act (ESA) of 1973 in the United States, to protect various species. We work with law enforcement to prosecute wildlife crimes, like wildlife trafficking and illegal hunting (poaching). We also promote biodiversity to support the growing human population while preserving existing species and habitats.

we are working to slow the extinction of global species and to protect global biodiversity and habitats. Environmental filmmakers and photographers, like, N.A. Naseer are essential to conservation efforts as well, documenting and bringing attention to endangered wildlife all over the world.

Use case of wildlife token

Our donation to the National Geographic Society supports critical research, exploration, and education programs around the globe. Because of caring people like you, conservationists in the field are working to preserve critical species like lions and elephants, explorers are documenting and protecting the last wild places on the planet, and scientists and researchers are pushing the boundaries of discovery.

We are donating 10% of our total wildlife tokens

Our goals are to connect all wildlife sanctuaries over the world and We would like our token to be used for payments at Wildlife Sanctuaries in the future.

What is wildlife token

Everything in the world is changing from day to day. The advancement in the blockchain technology and Smart Contracts has increased the possibilities that one can achieve various financial/commercial goals through cryptocurrency. As the world moves towards adopting cryptocurrency as an accepted medium of payment, the endless convenience and benefits it offers outweigh the risks that exist. Some of the advantages that blockchain technology offers are, but not limited to, instant verification. faster processing, lower transaction fee and better security among other benefits.

As a 100% GREEN cryptocurrency designed for the general public's commercial use in the real world, American Coin (symbol AC) is an innovative cryptocurrency based on the latest MIT's blockchain technology, which may be extensively used for cross border payments, in addition to other decentralized finance (DeFi) applications.

In compliance with BEP-20 Standard, American Coin's main features are summarized below:

1. Almost-zero energy consumption.
2. Almost-zero gas fees for large number of international transactions,
3. Instant cross-border payment transactions, 4) Globalized commercial use as a key.
4. BETTER international education as a focus. 6) Compatible with both BEP-2 and ERC-20 platforms.

Through the blockchain-based financial products, American Coin plans to empower people from different economic backgrounds to get access to financial services like lending easily without having to rely on the traditional financial service providers.

Especially, American Coin's underlying financial Infrastructure creates DeFi products and services to bring hope to the lives of billions who are currently deterred from achieving their dreams because of the present under-performing financial system.

According to MIT's latest information, approximate 1.6 2.0 billion of people are still living WITHOUT any bank account and/or financial services.

Why should you use crypto currencies?

Why Should You Use Cryptocurrency? Since 2009, when Bitcoin was launched there have been numerous alternative cryptocurrencies on the market that have exponentially risen in value.

Based on the initial assessment of the marketplace, we assume that cryptocurrency utilization will continue to rise, and in 2021, we will likely see a continued spike in blockchain space along with the further maturing of cryptocurrency as an asset. As of July 20, 2021, the global crypto market cap is \$1.21 trillion.

Even bitcoin is the front-runner of cryptocurrency and accounts for about 45% of the overall market capitalization today, the altcoin boom (such as AC, ETH, Tron, etc.) is predicted to outpace Bitcoin in the upcoming 2 years.

This has shown a great opportunity as a lucrative investment and commercial application for many entrepreneurs, investors and the general public who are looking out to cash in the cryptocurrency frenzy.

What Is BEP-20 Standard and Binance Smart Chain?

The BEP-20 Standard is a native standard of the Binance Smart Chain ("BSC"). It acts as a blueprint of how the BEP-20 cryptocurrencies can be utilized. Actually, it may be used to represent either shares or fiat. Today it has become the most prominent blockchain on the market.

BSC is an open source, decentralized platform that allows the implementation of smart contracts that allow users to interact in a trustless environment because the terms of agreement automatically transfer digital assets between parties when certain present conditions are met. Many experts believe that this system will replace the current budgetary systems one day because of its simplicity and open access utility.

Practically, the cryptocurrency protocol BEP-20 is utilized for payments on the network and as a store of significant value. Similar with Bitcoin, however, with a few things to note about BSC is that is substantially quicker and the transaction fees are significantly lower than Bitcoin.

Leading companies around the world in finance (such as Santander, JP Morgan, ING), technology (such as Microsoft, Intel, Samsung), and retail (such as Tesla, Toyota enterprises are putting resources into this system, and are even moving their entire business infrastructures over to blockchain.

Atlantis Coin Inc does the same as these leading companies and even further. Its blockchain based ecosystem will become more and more popular in the near future.

Conclusion

As the world's FIRST (1st) 100% green cryptocurrency with almost-zero energy consumption and the world's FIRST (1st) cryptocurrency to be accepted by licensed U.S. law firm/s as a payment currency for legal services. Wildlife token and its blockchain-based ecosystem strives to make the fintech decentralized and cross-border payments accessible to the general public from both the lower and higher income groups alike.

Based on the latest MIT technology and BEP-20 Standard, Wildlife token uses the most advanced Blockchain concepts as the core part of its operational technology that is always scalable and sustainable, and thus is a rising faster to stay from now on.

Further, because Wildlife token's energy consumption is almost zero, and there is no air pollution, extra noise and heat while a computer is running, it is undoubtedly the GREENEST cryptocurrency for environmental protection, climate change prevention, and healthy living condition.

Last but not least, Wildlife token is expected to become the BEST payment cryptocurrency for commercial uses worldwide. It is very practical and workable for the commercial world. Global users of Wildlife token may extensively enjoy its instantness of transactions, almost-zero gas fees, dozens of thousands of times TPS faster than Bitcoin, Ethereum and other coins based on them, in addition to well acceptable prices whenever they start using it. It's for sure!

Architecture and Logic of wildlife token

Wildlife token are BEP-20 standard tokens issued on the basis of Binance Smart Chain. Immediately after the ICO, wildlife token's allocations will be the following (Year 1):

- 10%: Strategic Partners / Institutional Investors (long term holders)
- 10% Ecosystem Development
- 10% donations to save wildlife/mother earth

The allocation of the net proceeds of the ICO. after deduction of applicable transaction, the following:

- 20% Research & Development
- 20% Liquidity

By the end of Year, the reserved Wildlife token will be fully distributed and allocated to Management and Shareholders.

In order to support the Wildlife token's market stability and avoid market manipulate will utilize the Reserve Fund whenever the market becomes too volatile.

Market opportunities

Focused on commercial use of cryptocurrency worldwide, Wildlife token's market opportunity depends on the market of the real commercial transactions.

The total value of global retail payments transactions was estimated at US\$16 trillion in 2018. This is estimated to increase up to US\$21 trillion by 2023. The estimation comprises consumer to-merchant transactions across retail verticals, such as food and grocery, apparel, consumer durables, etc.

Digital payments contributed to 8%, which was US\$1.26 trillion of the overall global retail payment market in 2018 and is projected to increase to 18% -24% by 2023. which will be US\$6.3 trillion.

The global payments revenue market size is approximately US\$2 trillion and steadily rising. In most cases, global payments are the payments revenues that include direct and indirect revenues generated by non-cash payment services (excluding interbank transfers).

Simply speaking, it's the total revenues collected by financial service companies around the globe. As shown in the graph, the global payment revenues should reach US\$2.2 trillion over the upcoming years.
